

Naloxone (Narcan) Train the Trainer

Training will go over all information needed to provide your own Narcan training.

This training prepares individuals to train those who will discuss overdose education and naloxone use with individuals at risk of experiencing or witnessing an opioid overdose. This class is most appropriate for individuals who will offer trainings to county agencies & health departments, treatment providers, social service agencies (including homeless shelters, domestic violence shelters, food banks, etc), medical providers, and other community organizations and agencies that may work with at-risk individuals.

Core Material (2 hours):

- Opioid Overdose Background: Learn about opioid overdose causes and trends
- Opioid Epidemic: Learn about existing efforts to combat the opioid crisis and legislative protections for naloxone use and dispensing
- Opioid Overdose Prevention, Recognition, and Response: Learn how to correctly identify and respond to an overdose event, including how to administer naloxone, and how to prevent future overdoses
- Delivering Overdose Education and Naloxone Distribution: Learn how to provide clients with overdose education, and either distribute or recommend how and where a client can acquire naloxone.

If you would like an in house training for your agency on this or Medication Assisted Treatment (methadone, suboxone, vivitrol), please e-mail me at acowan@clarematrix.org.
